MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

DATE: August 25, 1993

SUBJECT: State Highway Location Reference

Attached for your use is the official 1993 State Highway Location Reference (HLR). The HLR identifies roadway locations (milepoints), and is arranged by route number. It includes all state maintained highways, spurs, service roads and a listing of changes ("route alert"). The HLR locates, by milepoint, all:

- ♦ structures;
- ♦ railroad crossings;
- ♦ geographic boundaries;
- ♦ exit numbers;
- ♦ mile markers;
- ♦ functionally classified roads; and
- ♦ intersecting state highways.

Milepoints correspond to the Highway Videolog File. The HLR describes the system as of December 31, 1992.

NEW FEATURES this year are:

- ♦ the inclusion of mile markers;
- ♦ exit numbers; and
- ♦ major intersecting county and municipal roads.

Access to Highway Information Services Division's on-line data base is now available to those offices having access to the Ethernet network at SHA Headquarters. Sign into isl, enter the user-id 'guest', password 'mdlsha', and you will have access to on-line location reference and physical feature data, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, dBASE III, Word Perfect, and ASCII or text files. Please contact Mike Baxter for this information.

My telephone number is (410) 333-1369

Maryland Relay Service for Impaired Hearing or Speech
1-800-735-2258 Statewide Toll Free

Mailing Address: P.O. Box 717 • Baltimore, MD 21203-0717
Street Address: 707 North Calvert Street • Baltimore, Maryland 21202

Page 2

The HLR is also available by individual county at your request. If you need additional copies of the HLR or need additional information, please contact Mr. Karl Hess at (410) 333-1310.

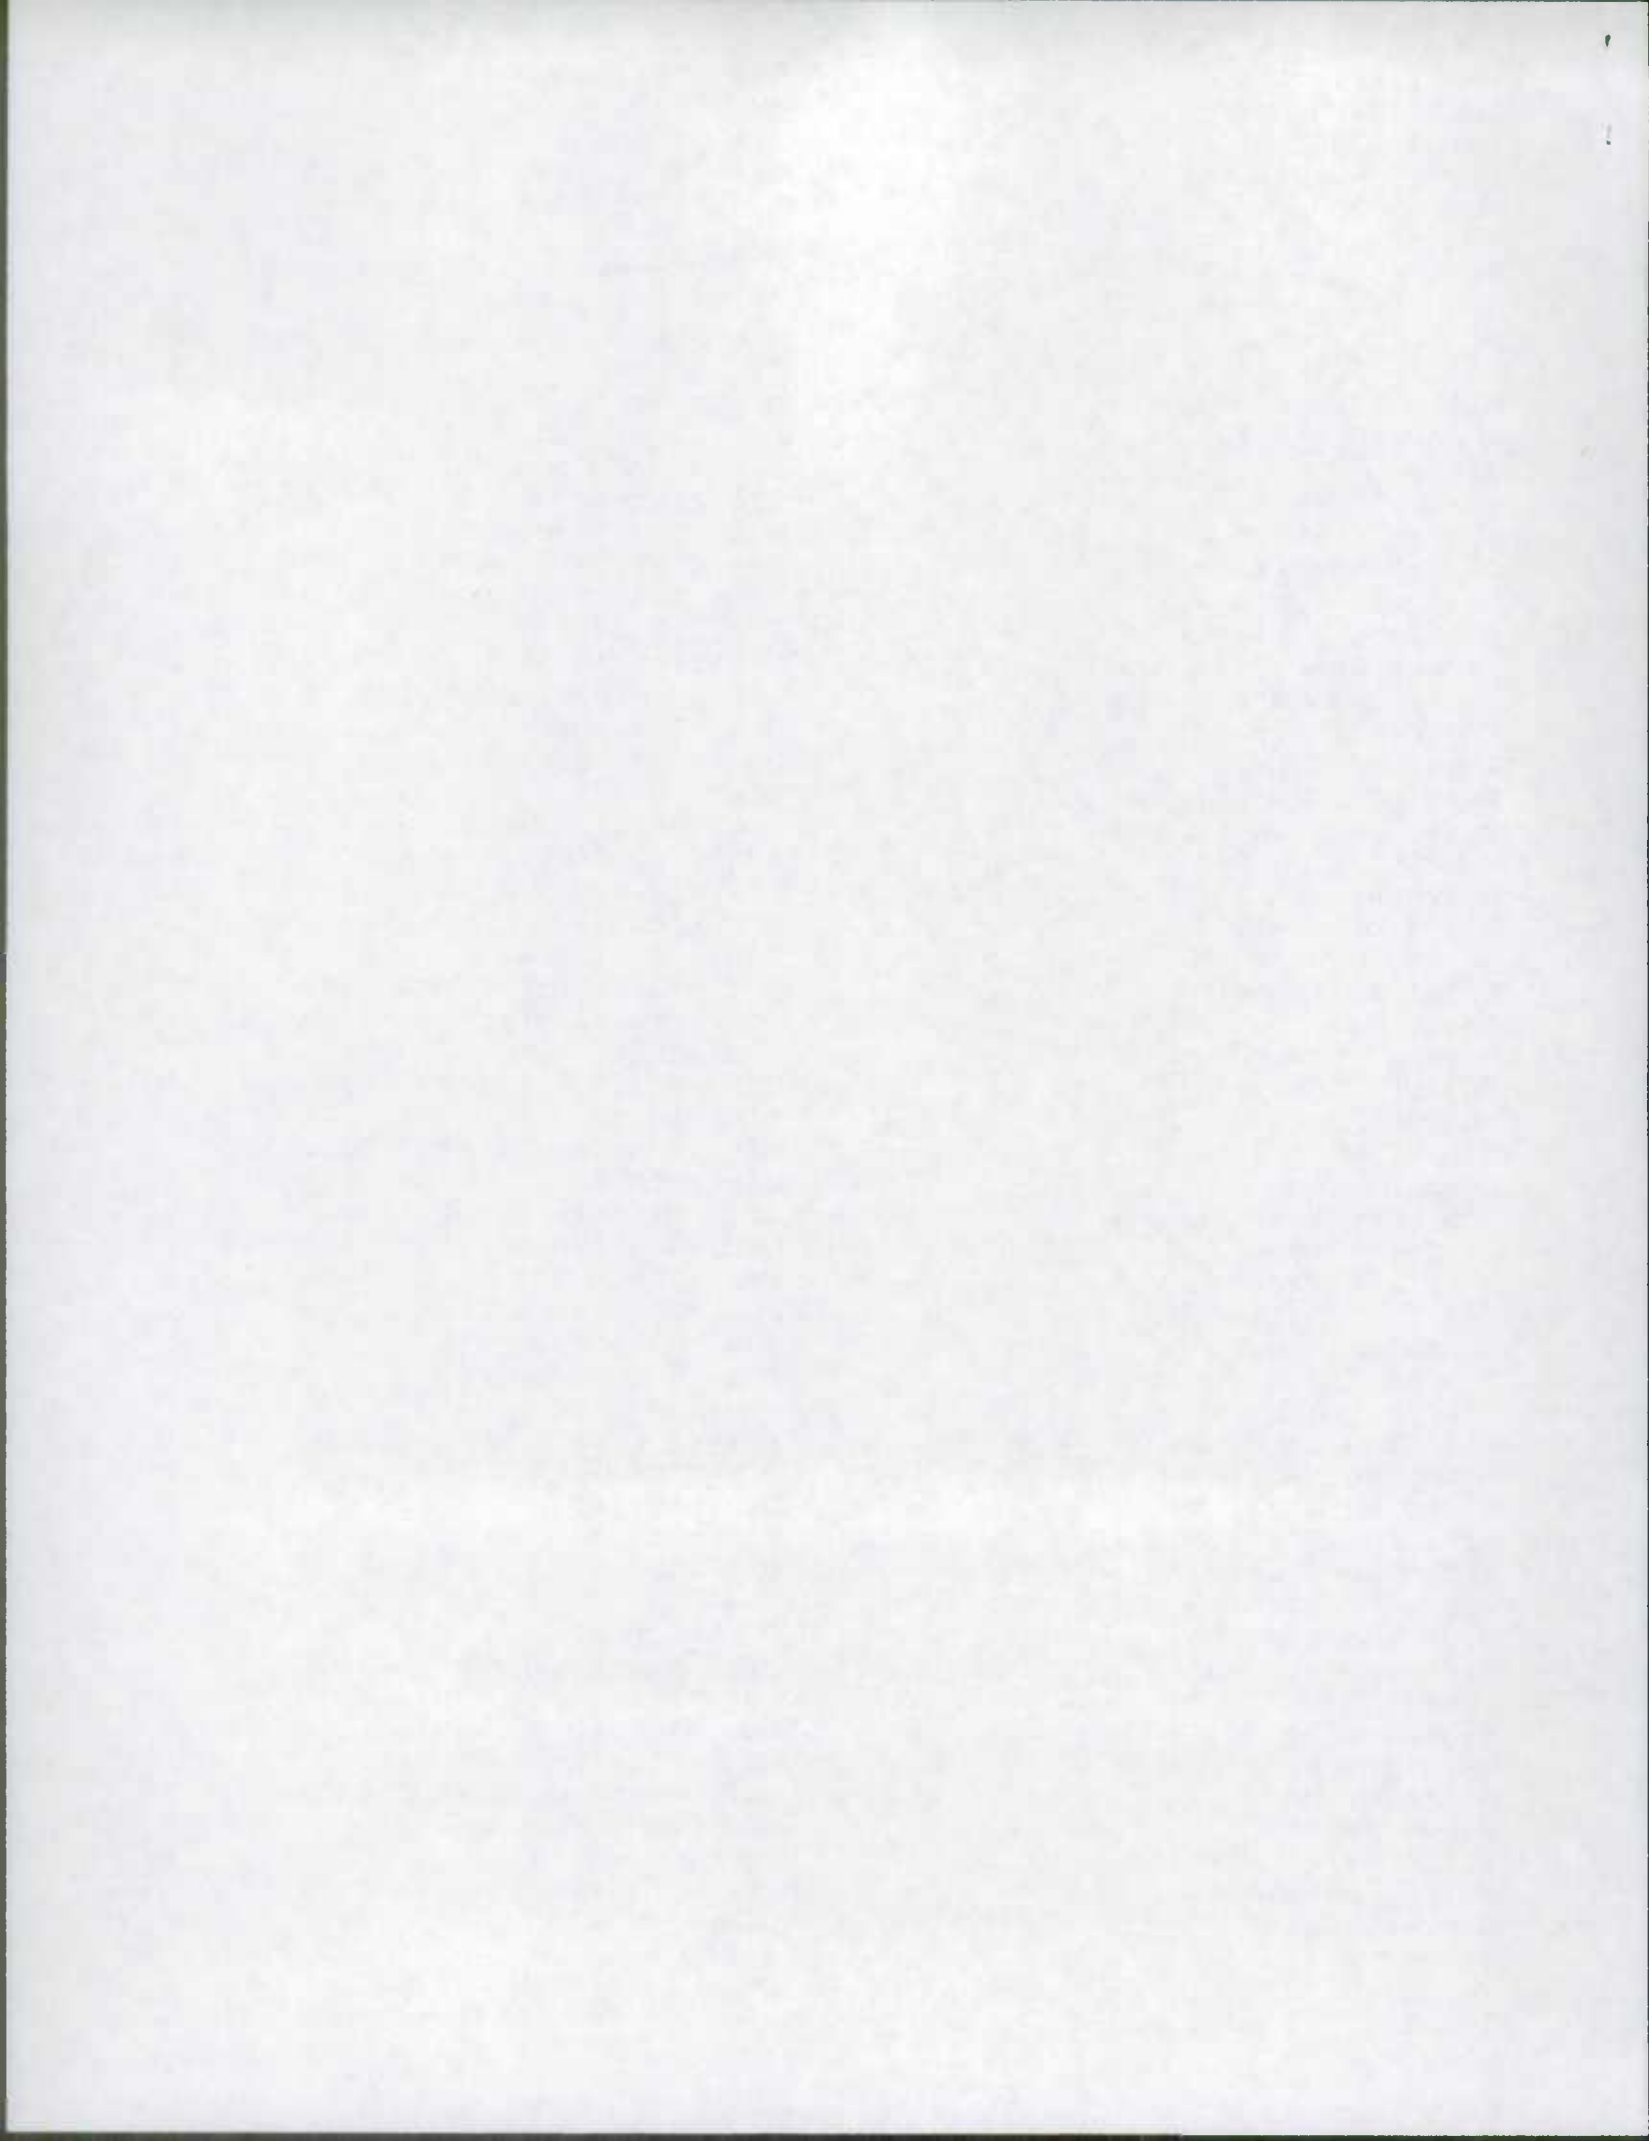

Please help us make this system as complete as possible by reviewing this HLR and completing the attached self-addressed CUSTOMER SURVEY form. It would be especially helpful if you could return the survey by September 17, 1993.

MEMORANDUM

TO: Distribution List

FROM: Michael R. Baxter, Manager
Data Support Team
Highway Information Services Division

DATE: Tuesday, September 26, 1995

SUBJECT: State Highway Location Reference

Attached for your use is the official 1995 State Highway Location Reference (HLR). The HLR identifies roadway locations (milepoints), and is arranged by route number. It includes all state maintained highways, spurs, service roads and a listing of changes ("route alert"). The HLR locates, by milepoint, all:

- ◆ structures;
- ◆ railroad crossings;
- ◆ geographic boundaries;
- ◆ exit numbers;
- ◆ mile markers;
- ◆ functionally classified roads;
- ◆ intersecting state highways;
- ◆ mile markers;
- ◆ exit numbers; and
- ◆ major intersecting county and municipal roads.

Milepoints correspond to the Highway Videolog File. The HLR describes the system as of December 31, 1994.

Access to Highway Information Services Division's on-line data base is now available to those offices having access to the CADD/GIS network. Sign into is1, enter the user-id 'guest', password 'md1sha', and you will have access to on-line location reference and physical feature data, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

1848

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, Excel, dBASE III, Word Perfect, Microsoft Word and ASCII or text files. Please contact Mike Baxter at (410) 333-1308 for this information.

The HLR is also available by individual county at your request. If you need additional copies of the HLR, need additional information, or know of any changes to our distribution list, please contact Mr. Karl Hess at (410) 333-1324.

Please help us make this system as complete as possible by reviewing this HLR and completing the attached self-addressed **CUSTOMER SURVEY** form. It would be especially helpful if you would return the survey by October 13, 1995.

DATE: August 16, 1994

SUBJECT: State Highway Location Reference

Attached for your use is the official 1994 State Highway Location Reference (HLR) for your respective counties. This HLR identifies roadway locations (milepoints), and provides some commonly requested data elements. The HLR, arranged by route number, provides data for all state maintained highways, spurs, and service roads. This HLR also locates by milepoint all structures, railroad crossings, geographic boundaries, exit numbers, mile markers, all functionally classified roads, and intersecting state highways. The milepoints correspond to those controlling the Highway Videolog File in order to provide pertinent information concerning the specific section of highway being viewed. Please note that this HLR contains information on the State Highway system as of December 31, 1993.

Access to HISD's on-line data base is now available to those offices having access to the Ethernet network at SHA HQ. Sign into isl, enter the user-id 'guest', password 'mdlsha', and you will have access to on-line location reference and physical feature data, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, dBASE III, Word Perfect, and ASCII or text files.

The HLR is also available in book form at your request. If you need additional copies of the HLR, need additional information, or know of any changes to our distribution list, please contact Mr. Karl Hess at (410) 333-1310.

MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

DATE: August 25, 1993

SUBJECT: State Highway Location Reference

Attached for your use is the official 1993 State Highway Location Reference (HLR). The HLR identifies roadway locations (milepoints), and is arranged by route number. It includes all state maintained highways, spurs, service roads and a listing of changes ("route alert"). The HLR locates, by milepoint, all:

- ♦ structures;
- ♦ railroad crossings;
- ♦ geographic boundaries;
- ♦ exit numbers;
- ♦ mile markers;
- ♦ functionally classified roads; and
- ♦ intersecting state highways.

Milepoints correspond to the Highway Videolog File. The HLR describes the system as of December 31, 1992.

NEW FEATURES this year are:

- ♦ the inclusion of mile markers;
- ♦ exit numbers; and
- ♦ major intersecting county and municipal roads.

Access to Highway Information Services Division's on-line data base is now available to those offices having access to the Ethernet network at SHA Headquarters. Sign into isl, enter the user-id 'guest', password 'mdlsha', and you will have access to on-line location reference and physical feature data, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, dBASE III, Word Perfect, and ASCII or text files. Please contact Mike Baxter for this information.

My telephone number is (410) 333-1369

Mailing Address: P.O. Box 717 • Baltimore, MD 21203-0717
Street Address: 707 North Calvert Street • Baltimore, Maryland 21202

Page 2

The HLR is also available by individual county at your request. If you need additional copies of the HLR or need additional information, please contact Mr. Karl Hess at (410) 333-1310.

Please help us make this system as complete as possible by reviewing this HLR and completing the attached self-addressed CUSTOMER SURVEY form. It would be especially helpful if you could return the survey by September 17, 1993.

Customer Survey

Highway Location Reference (the book of milepoints)

Is the distribution of the document adequate? If not, to whom should the document be sent?

Please indicate your overall rating of satisfaction with the product, with 'A' being excellent and 'E' being poor.

A B C D E

What are the most useful items of information?

What are the least useful items of information?

What information would you like to see in the product that is not currently included?

How would you change the product to make it better for your use?

Customer Survey
Highway Location Reference

Page 2

Do you find the route alert list to be helpful? Please indicate your overall rating of the utility of the route alert list, with 'A' being excellent and 'E' being poor.

A B C D E

Are you aware that the information contained in the Highway Location Reference is available electronically?

When you call with questions about the product, How would you rate the service you receive; with 'A' being excellent and 'E' being poor.

A B C D E

If you have any problems or concerns with the Highway Location Reference or you want to discuss any of the items on this questionnaire, please write your name, address and phone number below and someone will contact you as soon as possible.

T.W.I.M.C. - F.Y.I.

HIGHWAY LOCATION REFERENCE BOOKS

The originals for the cover and each Individual County Fly Sheet and Maps are kept and should be kept by Bob Davison.

Heather Yates revises the data on the cover upon request. She does not automatically update each year, you must call to remind her. I usually call about two (2) months in advance of the estimated date for going to print.

Each year the "General Information" sheet should be read carefully and appropriate changes made. i.e., AADT Date.

The "State Highway Location Reference"

"Introduction" sheet should also be read carefully and the appropriate change made. i.e., date in paragraph four (4).

The "General Information" and "Introduction" sheets should be carefully typed new each year to insure good black print for the publication.

The County Fly Sheets are kept at Brooklandville and are available upon request.

Approximately two (2) weeks before estimated press day, call Brooklandville to assure all changes have been made to the originals including the maps and request they be sent to the office.

When they arrive, check each item to insure they are complete and accurate. Specifically make sure all new major routes have been put on the maps.

For 1987, I have requested that Bob Davison make a new set of maps eliminating all milepoint designations. The maps will only show the routes within a county and the route numbers. You must be sure all routes are on the new maps, especially the short spurs and connectors that carry their own route number.

In addition to the above, a new sheet with the functional classifications and their codes must be typed and included in both volumes.

Highway Location Information

The city will let the cover and each individual house by street and house air kept and should be kept by the city.

Weather data system. The data of the cover and house air kept and should be kept by the city. The data of the cover and house air kept and should be kept by the city.

Each year the annual information should be kept by the city and should be kept by the city.

The town highway location information.

"Information" is a book which is kept by the city and should be kept by the city.

The "Information" is a book which is kept by the city and should be kept by the city.

The "Information" is a book which is kept by the city and should be kept by the city.

The "Information" is a book which is kept by the city and should be kept by the city.

The "Information" is a book which is kept by the city and should be kept by the city.

The "Information" is a book which is kept by the city and should be kept by the city.

In addition to the above, a new book with the title "Information" and the name "Information" should be kept by the city.

INDIVIDUAL COUNTY LISTINGS FOR THE RESIDENT MAINTENANCE ENGINEERS

In addition to the books, Individual County listings must be printed for the Resident Maintenance Engineers.

These listings include everything in the book for each county. Be sure to include the new Functional Classifications Codes with these listings.

This year for the first time I have requested a new cover sheet for these listings. The old cover sheet, was the same as the one in the book. The new sheet will contain the year of the publication, as does the cover on the books. Heather Yates has been requested to make these listing covers.

PRINTING

Three (3) to four (4) weeks before printing, go to repro. and find out what color stock is available for the book cover. If the color you want is not available, they may have to order it. You must know how many books you want printed before they can order material.

When going to press go to repro. with everything you need, including samples of what you expect the finished product to look like. i.e., a complete set, Vol. I & II of books (Last years issue) with all pages in order including where you want the new F/C Code sheet. At this time you will need all the originals or good copies of the originals and the listing. You do not have to break up the listing by county repro., people did that in the past.

Since the cover sheet for the Individual County listings is different than that in the book, you must bring that to the attention of the head honcho in reproduction. Do not forget the F/C Code Sheet in the Individual County listings.

NUMBER OF COPIES REQUIRED OF EACH

For the 1986 books we had two hundred (200) copies made. There is approximately thirty (30) sets of books left from 1986 publication and the distribution has been recorded.

For the 1986 Individual County listings we had forty (40) copies of each county printed and I believe that is more than we need. Perhaps twenty-five (25) could be printed and if more is needed you can make copies in house.

INDIVIDUAL COUNTY LISTING FOR THE
HIGHEST MAINTENANCE RATES

In addition to the books, individual county listing must be
printed for the highest maintenance rates.

These listings include everything in the book for each
county. Be sure to include the new individual listings
codes with these listings.

This year for the first time I have completed a new
sheet for these listings. The old cover sheet was the same as
the one in the book. The new sheet will contain the year of the
publication, as does the cover on the book. Another year has
been requested to make these listing covers.

CHITTING

These 127 to 130 127 weeks before printing go to
the end of the year. When the book is available for the book cover.
If the color you want is not available, they are listed in order.
At. You must know how many books you want printed before they
can order material.

When going to press go to table with everything you need
including samples of what you want. The listing product to look
like. The listing is not. The listing is not. The listing is not.
listing with all pages in order. Listing where you want the new
listing. At this time you will need all the original
good copies of the original and the listing. You do not have to
break up the listing by county report. People did this in the
past.

Since the cover sheet for the individual county listing is
different than that in the book, you must bring that to the
attention of the head printer or representative. Do not forget the
listing sheet in the individual county listing.

NUMBER OF COPIES REQUIRED OF EACH

For the 1988 books we had two hundred (200) copies made.
There is approximately thirty (30) sets of books left from 1988
publication and the distribution has been reached.

For the 1988 individual county listings we had forty (40)
copies of each county printed and I believe that is more than we
need. Perhaps twenty-five (25) would be printed and it would be
needed you can make copies in house.

In addition to the listings and books the letters and distribution lists must be reviewed to assure they are current. Whenever possible, the books should be sent to the individual that uses the book. Sending them to the Bureau Chiefs or Supervisors do not always work and the people that use the book do not always get them, and just call us for an additional copy which creates wasted copies.

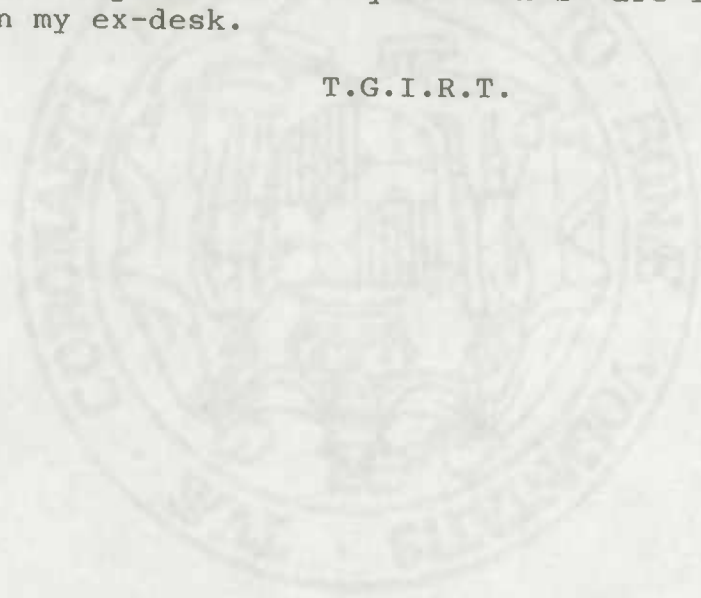

NOTE: GET THE LETTERS SIGNED BEFORE THEY ARE REPRODUCED.

Prior to making distribution, check three (3) or four (4) books from each box to make sure the books are complete and in correct order. Last year Calvert County was not in some books and some pages were inverted (upside down).

Likewise with the Individual County listings make sure the cover reflects the same county as the listing.

Last years "Reproduction Requisition's" are in a folder marked HLRP on my ex-desk.

T.G.I.R.T.

In addition to the list and books the letters and
distribution lists must be reviewed to assure that any material
whenever possible, the books should be sent to the individual
that want the book. Sending them to the Bureau Chief or
superior do not always work and the people that want the book
do not always get them and just call us for an additional copy
which creates wasted copies.

NOTE: GET THE LETTERS SIGNED BEFORE THEY ARE REPRODUCED.

Prior to making distribution, check items (1) or (2) or (3)
books from each box to make sure the books are complete and in
correct order. Last year's list should not be in new books
and some papers were inserted inside down.

Discussion with the individual people listed with the
cover reflects the same copy as the list.

Last year's "Reproduction Form" are in a folder
marked BRL on the desk.

MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

SUBJECT: State Highway Location Reference

We have attached for your use and information copies of the 1990 State Highway Location Reference for your respective counties. This reference is designed to provide a method of uniquely identifying roadway locations (milepoints), and also to provide data elements that are most commonly requested.

The reference is arranged by route number and provides data relating to all state maintained highways, spurs, and service roads, such as, state and federal systems, milepoint descriptions, number of lanes, surface type and width, and the latest annual average daily traffic (AADT). This reference also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways which should be sufficient to locate and reference any additional or new data you may be collecting or recording.

A strong effort has been made to develop an accurate and comprehensive reference system. Please help make this system as complete as possible by reviewing it and reporting any errors or omissions to Mr. Karl Hess at 333-1310.

If you desire additional copies or need additional information, do not hesitate to contact this office.

FROM: John T. Hennen, Chief
Bureau of Highway Statistics

SUBJECT: State Highway Inventory

We have attached for your use and information copies of the
State Highway Inventory Reference for your information.
This reference is designed to provide a means of
uniquely identifying roadways, locations, distances, and also to
provide data elements that are most readily available.

The reference is arranged by route number and provides data
relating to all state highways, including state, county, and city
roads, such as: name, route number, location, description,
number of lanes, surface type, and other data. This reference is
designed to provide a means of uniquely identifying roadways,
locations, distances, and also to provide data elements that are
most readily available. This reference is arranged by route number
and provides data relating to all state highways, including state,
county, and city roads, such as: name, route number, location,
description, number of lanes, surface type, and other data.

A copy of this reference has been made available to the
comprehensive reference system. Please help us in this effort by
providing as possible by reviewing it and reporting any errors or
omissions to Mr. Michael Barker at 331-1308.

If you desire additional copies of this additional information,
please do not hesitate to contact this office.

Very truly,
John T. Hennen

MEMORANDUM

TO: See Attached Distribution List

FROM: Michael R. Baxter, Manager *Michael R. Baxter*
Data Support Team
Highway Information Services Division

DATE: Wednesday, September 13, 1995

SUBJECT: State Highway Location Reference

Attached for your use is the official 1995 State Highway Location Reference (HLR) for your respective counties. This HLR identifies roadway locations (milepoints), and provides some commonly requested data elements. The HLR, arranged by route number, provides data for all state maintained highways, spurs, and service roads. This HLR also locates by milepoint all structures, railroad crossings, geographic boundaries, exit numbers, mile markers, all functionally classified roads, and intersecting state highways. The milepoints correspond to those controlling the Highway Videolog File in order to provide pertinent information concerning the specific section of highway being viewed. Please note that this HLR contains information on the State Highway system as of December 31, 1994.

Access to HISD's on-line data base is now available to those offices having access to the CADD/GIS Network at SHA HQ. Sign into is1, enter the user-id 'guest', password 'md1sha', and you will have access to on-line location reference and physical feature data, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, dBASE III, Word Perfect, and ASCII or text files.

The HLR is also available in book form at your request. If you need additional copies of the HLR, need additional information, or know of any changes to our distribution list, please contact Mr. Karl Hess at (410) 333-1324.

MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

SUBJECT: State Highway Location Reference

Attached for your use is the official 1992 State Highway Location Reference (HLR) for your respective counties. This HLR identifies roadway locations (milepoints), and provides some commonly requested data elements. The HLR, arranged by route number, provides data for all state maintained highways, spurs, and service roads. This HLR also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways. This information should be sufficient to locate and reference any additional or new data you may be collecting or recording. The milepoints also correspond to those controlling the Highway Videolog File in order to provide pertinent information concerning the specific section of highway being viewed. Please note that this HLR contains information on the State Highway system as of December 31, 1991.

Access to HISD's on-line data base is now available to those offices having access to the Ethernet network at SHA HQ. Sign into isl_pn, enter the user-id 'guest', password 'md1sha', and you will have access to on-line location reference and physical feature, functional classification, etc. If you need help or information, please contact Mike Baxter, George Sims, or Jerry Einolf at (410) 333-1308.

Customized listings are available for state and local roads upon request, as are data files in various formats such as Lotus 1-2-3, dBASE III, Word Perfect, and ASCII or text files.

The HLR is also available in book form at your request. If you need additional copies of the HLR or need additional information, please contact Mr. Karl Hess at (410) 333-1310.

MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

SUBJECT: State Highway Location Reference

We are attaching for your information and use a copy of the 1990 State Highway Location Reference. This reference is designed to provide a method of uniquely identifying roadway locations (milepoints), and also to provide data elements that are most commonly requested.

The reference is arranged sequentially by county and route number, and provides data relating to all state maintained highways, spurs, and service roads, such as, system (state and federal), milepoint descriptions, number of lanes, surface type and width, and the latest annual average daily traffic (AADT). This reference also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways which should be sufficient to locate and reference any additional or new data you may be collecting. The milepoints also correspond to those controlling the Highway Photolog/Videolog File in order to provide pertinent information concerning the specific section of highway being viewed.

Should you require additional copies or have any questions or suggestions how we may improve this publication, please contact Mr. Karl Hess at 333-1310.

ROOM NO. 207

JOB NO. P 1000

August 8, 1990

MEMORANDUM

TO: See Attached Distribution List

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

SUBJECT: State Highway Location Reference

We have attached for your use and information copies of the 1990 State Highway Location Reference for your respective counties. This reference is designed to provide a method of uniquely identifying roadway locations (milepoints), and also to provide data elements that are most commonly requested.

The reference is arranged by route number and provides data relating to all state maintained highways, spurs, and service roads, such as, state and federal systems, milepoint descriptions, number of lanes, surface type and width, and the latest annual average daily traffic (AADT). This reference also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways which should be sufficient to locate and reference any additional or new data you may be collecting or recording.

A strong effort has been made to develop an accurate and comprehensive reference system. Please help make this system as complete as possible by reviewing it and reporting any errors or omissions to Mr. Karl Hess at 333-1310.

If you desire additional copies or need additional information, do not hesitate to contact this office.

FROM: John T. Neukam, Chief *John T. Neukam*
Highway Information Services Division

SUBJECT: State Highway Location Reference

We are attaching for your information and use a copy of the 1990 State Highway Location Reference. This reference is designed to provide a method of uniquely identifying roadway locations (milepoints), and also to provide data elements that are most commonly requested.

The reference is arranged sequentially by county and route number, and provides data relating to all state maintained highways, spurs, and service roads, such as, system (state and federal), milepoint descriptions, number of lanes, surface type and width, and the latest annual average daily traffic (AADT). This reference also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways which should be sufficient to locate and reference any additional or new data you may be collecting. The milepoints also correspond to those controlling the Highway Photolog/Videolog File in order to provide pertinent information concerning the specific section of highway being viewed.

Should you require additional copies or have any questions or suggestions how we may improve this publication, please contact Mr. Karl Hess at 333-1310.

MEMORANDUM

TO: See Attached Distribution List
FROM: John T. Neukam, Chief *John T. Neukam*
Bureau of Highway Statistics
SUBJECT: State Highway Location Reference

We are attaching for your information and use a copy of the 1989 State Highway Location Reference. This reference is designed to provide a method of uniquely identifying roadway locations (milepoints), and also to provide data elements that are most commonly requested.

The reference is arranged sequentially by county and route number, and provides data relating to all state maintained highways, spurs, and service roads, such as, system (state and federal), milepoint descriptions, number of lanes, surface type and width, and the latest annual average daily traffic (AADT). This reference also locates by milepoint all structures, railroad crossings, geographic boundaries and intersecting state highways which should be sufficient to locate and reference any additional or new data you may be collecting. The milepoints also correspond to those controlling the Highway Photolog/Videolog File in order to provide pertinent information concerning the specific section of highway being viewed.

Should you require additional copies or have any questions or suggestions how we may improve this publication, please contact Mr. Karl Hess at 333-1310.
